WILBERT BURIAL VAULTS
(30” X 86”)

LINERS

PURPOSE

Liners are used with Wilbert Products to provide extra layers of protection against subsoil elements and weight of heavy cemetery equipment. The type of liner used is determined by the Burial Vault. In some cases, both plastic and metal liners are used, sometimes only plastic liners are used, and finally in the most basic cases no liners are used. Currently, the two types of Liners used are the following:

- Plastic Liners: High-Impact Plastic Material
- Metal Liners: Various Metal Types (Stainless Steel, Bronze, Copper)

INTERNAL PLASTIC LINERS

The following is a list and cross-section views of common Plastic Liners used in the internal side of the Burial Vaults.

Standard Base Liner

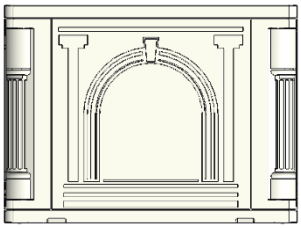

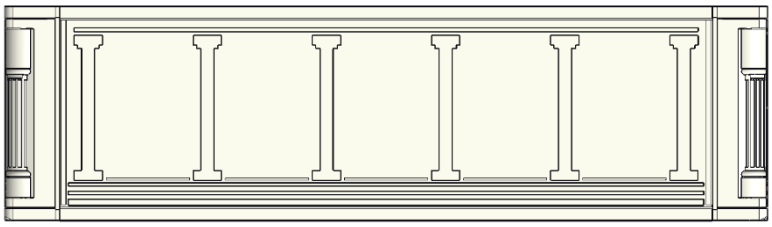

Speed Bump Base Liner

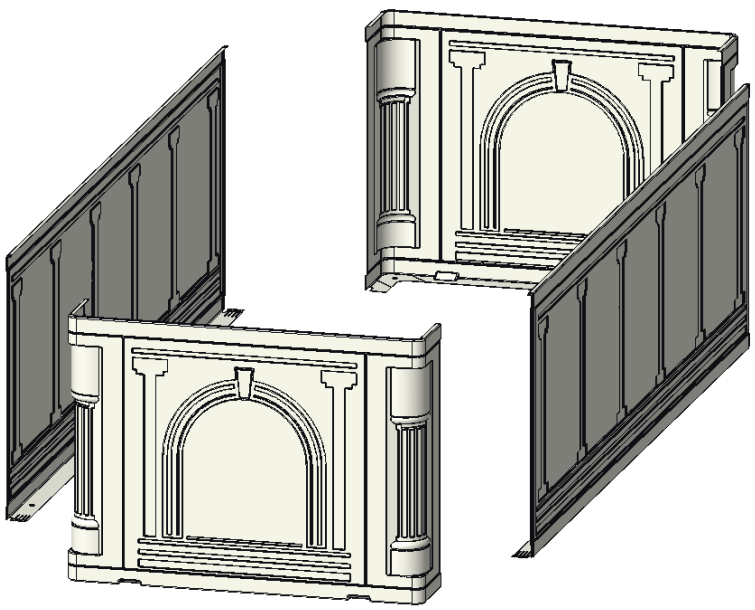

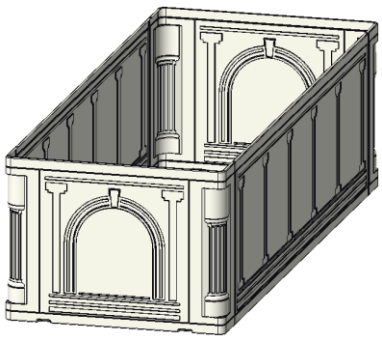

EXTERNAL PLASTIC LINERS

In some cases, additional layers of Plastic Liners are used in the external side of the Burial Vaults. Cross-section views are shown below.

Tribute Cover		
Wilbert Bronze Base Liner		
Tribute Base Assembly		

Tribute Base Assembly – Exploded View

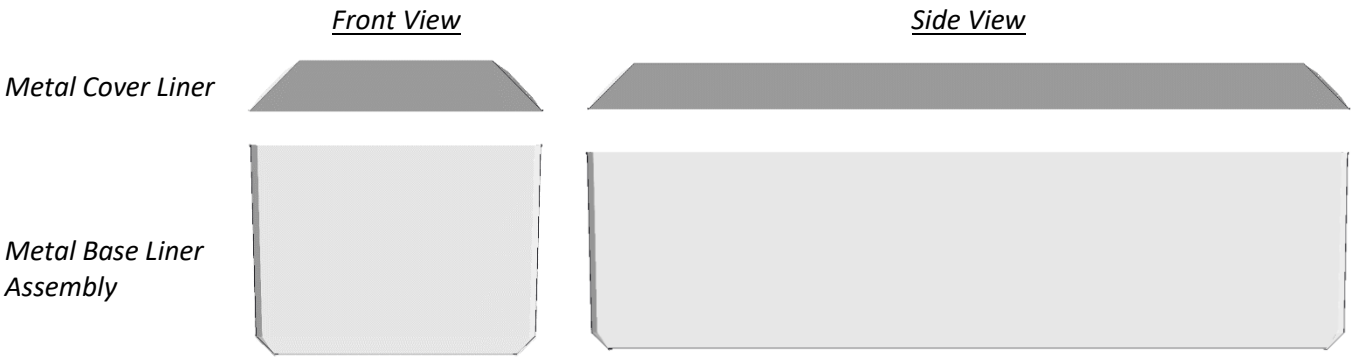

Notes:

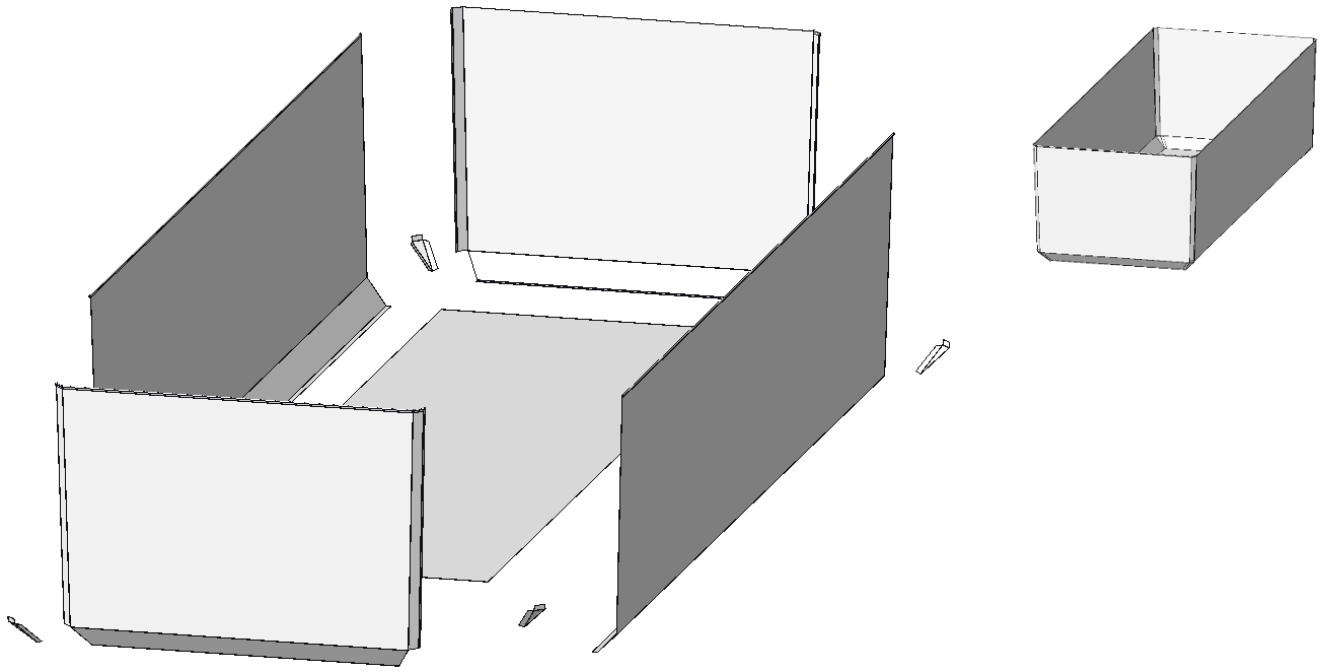

- Tribute Base Assembly components held together by epoxy at the joints

METAL LINERS

Unlike Plastic Liners, Metal Liners contain the same geometry all throughout, the only difference is the type of metal used. Note that the Metal Cover is a one-piece item, while the Base is made up of (1) bottom plate, (2) side sheets, (2) end sheets, and (4) corner pieces. Cross-section views are shown below.

Metal Base Liner Assembly – Exploded View

Notes:
- Metal Base Liner components held together by interlocking overlaps and tape at the joints

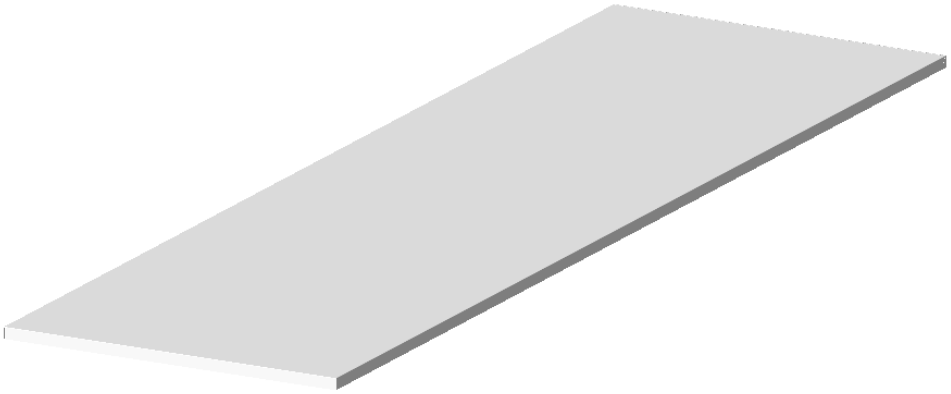

CARAPACE

PURPOSE

Carapaces are used with some Wilbert Burial Vaults for personalization purposes. The Carapace is added to the top of the cover, which can be displayed at the graveside for final tributes. Types of personalization can include the following:

- Emblems
- Engravings
- Personal Photographs
- Images
- Canvas

The Burial Vault defines the Carapace material, which is either Plastic or Metal. An example of a Carapace is shown below:

BONDING MATERIAL, SEAL TYPES, POST PROCESSING NOTE

BONDING MATERIAL

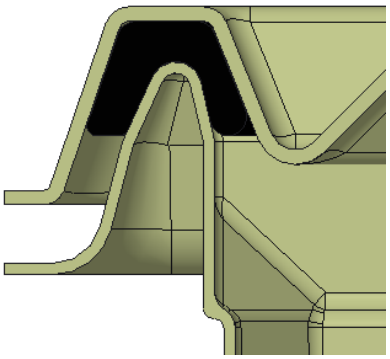

The manufacturing process for all Burial Vaults is essentially the same, however, a few bonding materials are key in the process. These materials are as follows:

- UNIDEX 2.0
    - Blue liquid material that is rolled/brushed on
    - Concrete and Plastic Liners bond
    - Metal and Plastic Liners bond
- 2-PART ADHESIVE
    - Carapace and Concrete Cover bond
- URETHANE CAULKING
    - Metal Base Surround and Base Assembly bond (Used only with Wilbert Bronze)

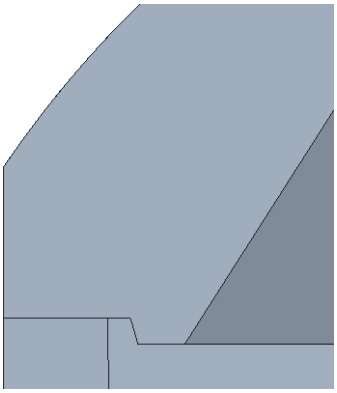

SEAL TYPES

Two types of seals exist between cover and base for all Burial Vaults, one that utilizes a layer of butyl tape and another that does not. The seal types are as follows:

- Tongue and Groove with Butyl
    - Layer of Butyl tape added at groove of Cover Plastic Liner
    - All Vaults that use Plastic Liners will used this type of seal
- Flat
    - No Butyl tape is used as the flat surface and weight of the cover allow the Vault to stay closed
    - This type of seal only utilized in Vaults that do not contain Plastic Liners

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

FLAT
(COVER – BASE SEAL)

POST PROCESSING NOTE

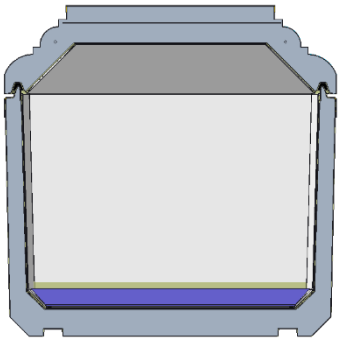

The schematics shown in the following sections are representations of the Burial Vaults after concrete has been poured and set. It does not include Finish application items such as:

- Finish color scheme
- Accessories (Name plate, Emblems, etc.)
- Hardware
- Vault Handles

Refer to the “Wilbert Product Manual” for a list of these items and other post processing applications.

METAL/LINED BURIAL VAULTS

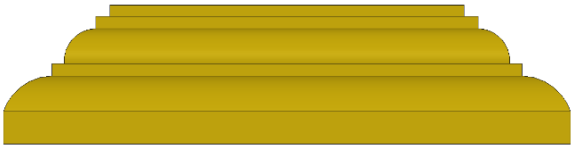

WILBERT BRONZE

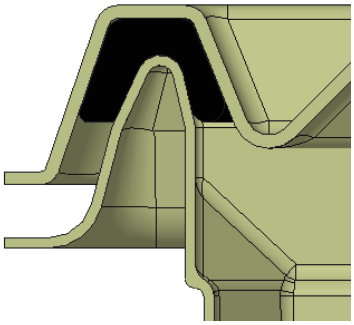

UNIT TYPE:	METAL/PLASTIC LINED UNIT
CONCRETE COVER PROFILE:	2 BUMPS – UNIQUE/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	MODERN COVER
BASE LINER:	FLAT BOTTOM BASE
CARAPACE:	METAL CARAPACE

NOTES/COMMENTS:

The Wilbert Bronze provides triple-reinforced protection by utilizing two layers of plastic liners and one of metal liners for cover and base. Other components unique to this Burial Vault, are the metal outside cover rails, metal base surround, and record tube. The casket rest is provided as an optional add-on. Schematics of the vault assembly shown in the next page.

2 BUMPS – UNIQUE/FLAT TOP
(CONCRETE COVER PROFILE)

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

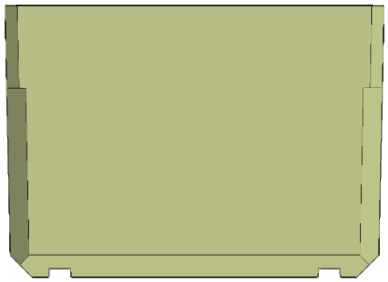

MODERN COVER
(INTERNAL PLASTIC LINER)

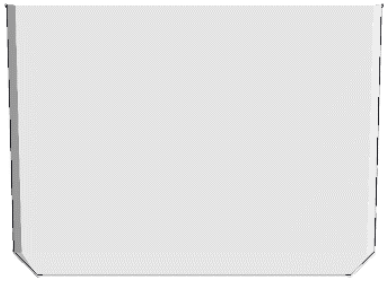

FLAT BOTTOM BASE
(INTERNAL PLASTIC LINER)

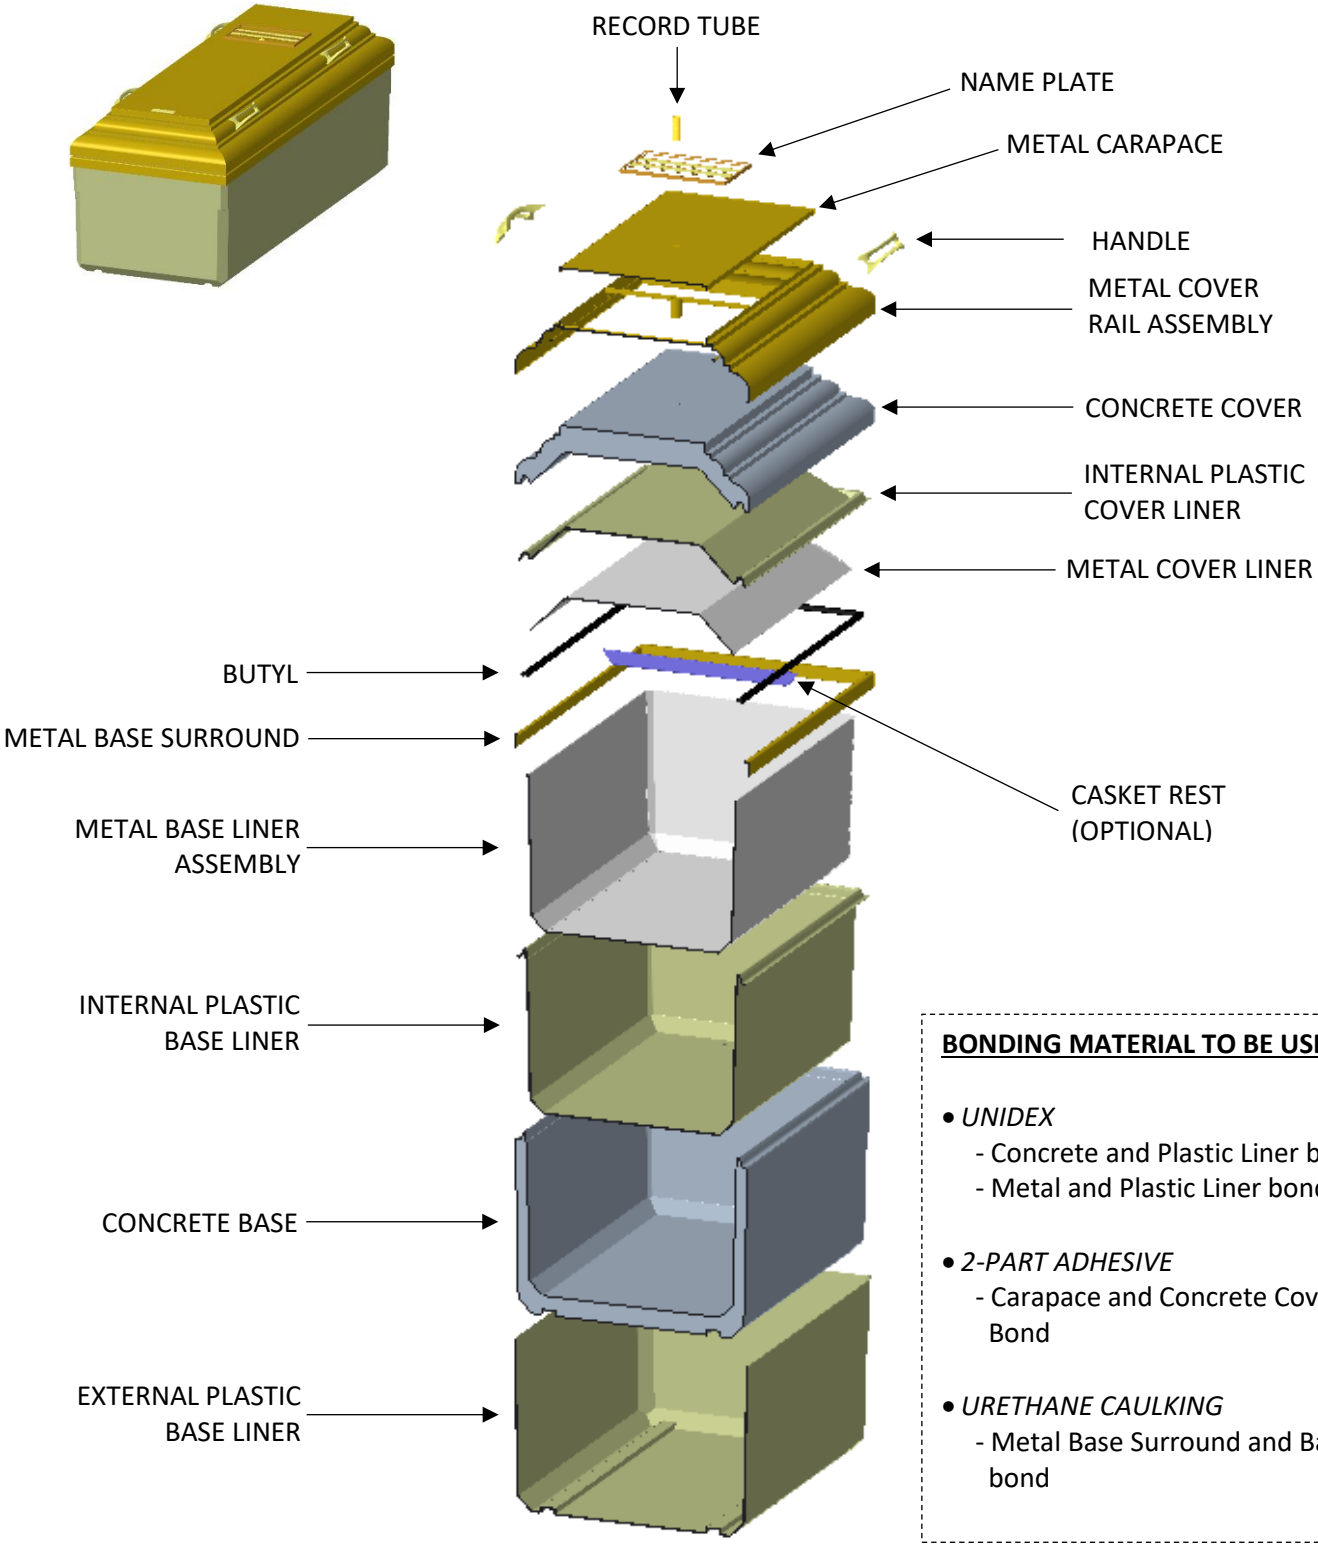

METAL COVER
(INTERNAL LINER)

WILBERT BRONZE BASE
(EXTERNAL PLASTIC LINER)

METAL BASE ASSEMBLY
(INTERNAL LINER)

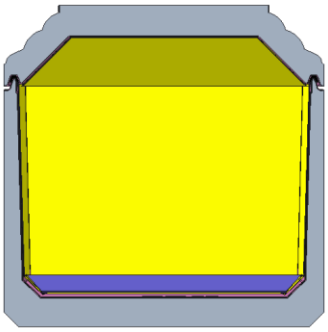

BONDING MATERIAL TO BE USED:

- *UNIDEX*
  - Concrete and Plastic Liner bond
  - Metal and Plastic Liner bond
- *2-PART ADHESIVE*
  - Carapace and Concrete Cover Bond
- *URETHANE CAULKING*
  - Metal Base Surround and Base bond

WILBERT BRONZE

SST TRIUNE/VETERAN/CAMEO ROSE/COPPER/BRONZE

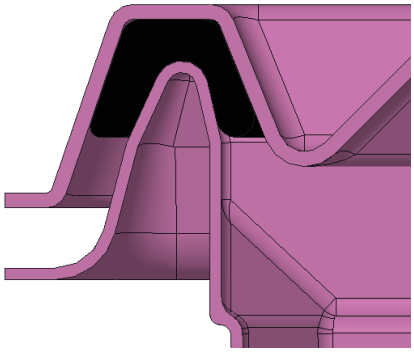

UNIT TYPE:	METAL/PLASTIC LINED UNIT
CONCRETE COVER PROFILE:	3 BUMPS/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	MODERN COVER
BASE LINER:	FLAT BOTTOM BASE
CARAPACE:	METAL CARAPACE

NOTES/COMMENTS:

These Burial Vaults provide double-reinforced protection by utilizing one layer of plastic liners and one of metal liners for cover and base. A **record tube** for the cement cover/carapace is optional for these vaults. The casket rest is provided as an optional add-on as well. Schematics of the vault assembly shown in the next page.

3 BUMPS/FLAT TOP
(CONCRETE COVER PROFILE)

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

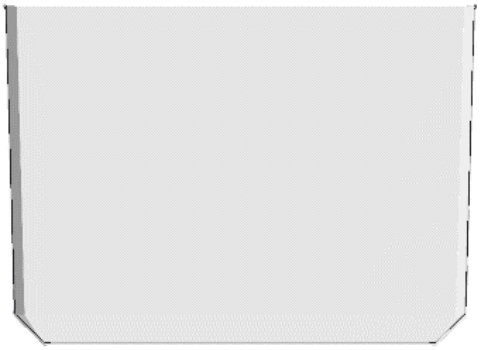

MODERN COVER
(INTERNAL PLASTIC LINER)

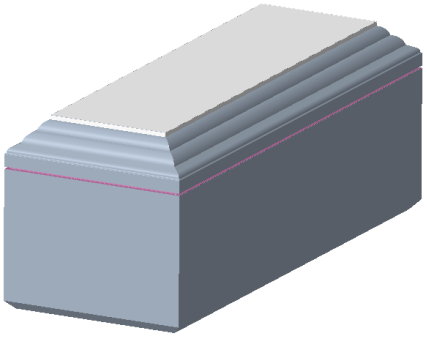

METAL COVER
(INTERNAL LINER)

(INTERNAL LINER)

BONDING MATERIAL TO BE USED:

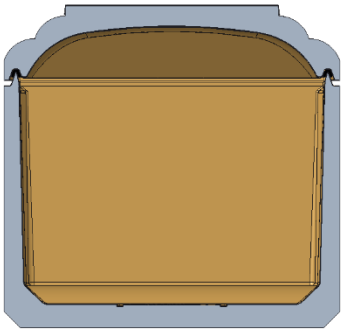

- *UNIDEX*
  - Concrete and Plastic Liner bond
  - Metal and Plastic Liner bond
- *2-PART ADHESIVE*
  - Carapace and Concrete Cover bond

SST TRIUNE/VETERAN/CAMEO ROSE/BRONZE

LINED BURIAL VAULTS

MONTICELLO/CEMETERY/SALUTE

UNIT TYPE:	PLASTIC LINED UNIT
CONCRETE COVER PROFILE:	2 BUMPS/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	DOME COVER
BASE LINER:	STANDARD BASE
	SPEED BUMP BASE
CARAPACE:	NONE

NOTES/COMMENTS:

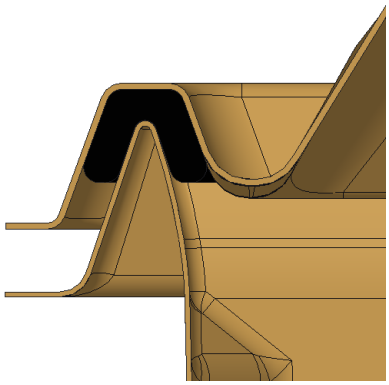

These Burial Vaults provide single-reinforced protection by utilizing one layer of Plastic Liners for cover and base. Caskets rests are built into the Plastic Base Liners and (2) options are available as shown below. Schematics of the vault assembly shown in the next page.

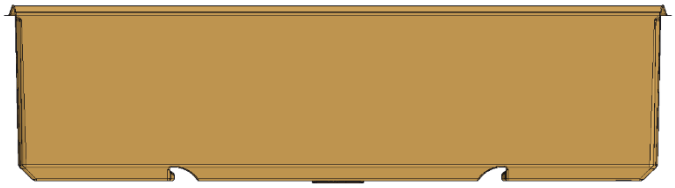

2 BUMPS/FLAT TOP
(CONCRETE COVER PROFILE)

DOME COVER
(INTERNAL PLASTIC LINER)

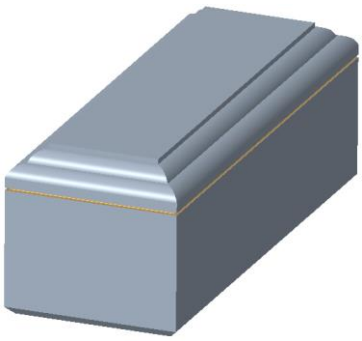

TONGUE AND GROOVE WITH BUTYL
(COVER - BASE SEAL)

STANDARD BASE
(INTERNAL PLASTIC LINER)
OPTION 1

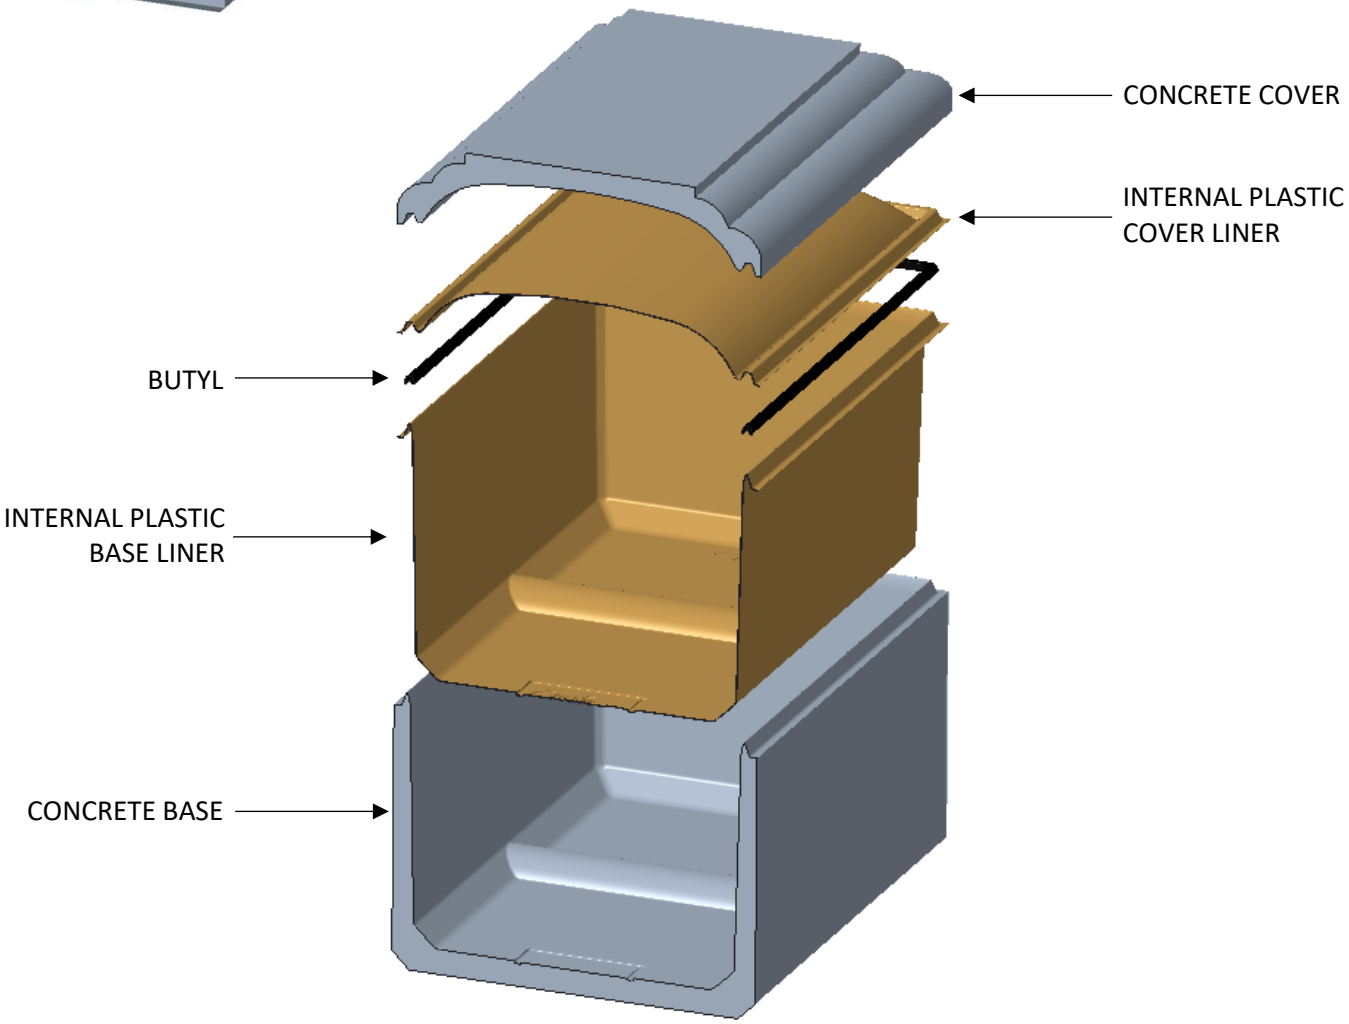

SPEED BUMP BASE
(INTERNAL PLASTIC LINER)
OPTION 2

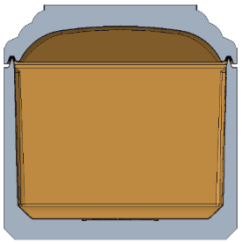

BONDING MATERIAL TO BE USED:

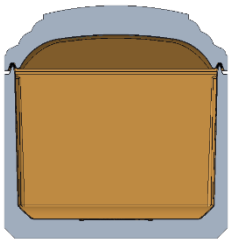

- *UNIDEX*
  - Concrete and Plastic Liner bond

MONTICELLO/CEMETERY/SALUTE

CONTINENTAL

UNIT TYPE:	PLASTIC LINED UNIT
CONCRETE COVER PROFILE:	3 BUMPS/FLAT TOP
	3 BUMPS/PRE-CAST ROUND TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	DOME COVER
BASE LINER:	STANDARD BASE
	SPEED BUMP BASE
CARAPACE:	FLAT TOP COVER – PLASTIC CARAPACE (OPTIONAL)
	PRE-CAST ROUND TOP COVER – NONE

NOTES/COMMENTS:

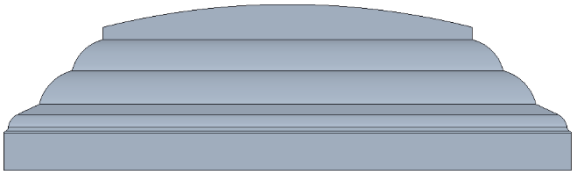

The Continental Vault provides single-reinforced protection by utilizing one layer of Plastic Liners for cover and base. Casket rests are built into the Plastic Base Liners and (2) options are available as shown below. One unique feature of the Continental Vault is the Pre-Cast Round Top option for the concrete cover as shown below. Schematics of the vault assembly shown in the next page.

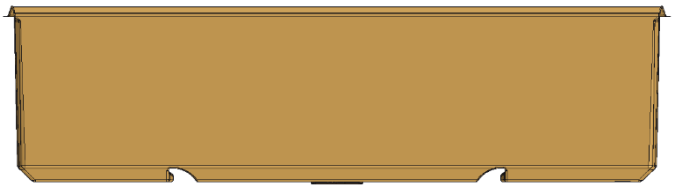

3 BUMPS/FLAT TOP
(CONCRETE COVER PROFILE)
OPTION 1

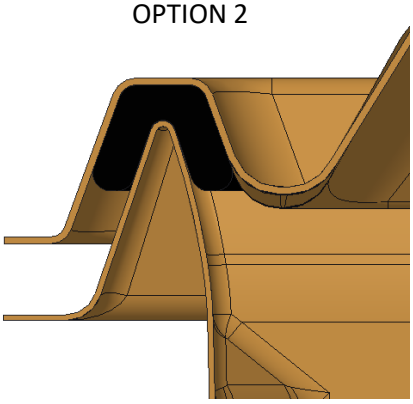

DOME COVER
(INTERNAL PLASTIC LINER)

3 BUMPS/PRE-CAST ROUND TOP
(CONCRETE COVER PROFILE)
OPTION 2

STANDARD BASE
(INTERNAL PLASTIC LINER)
OPTION 1

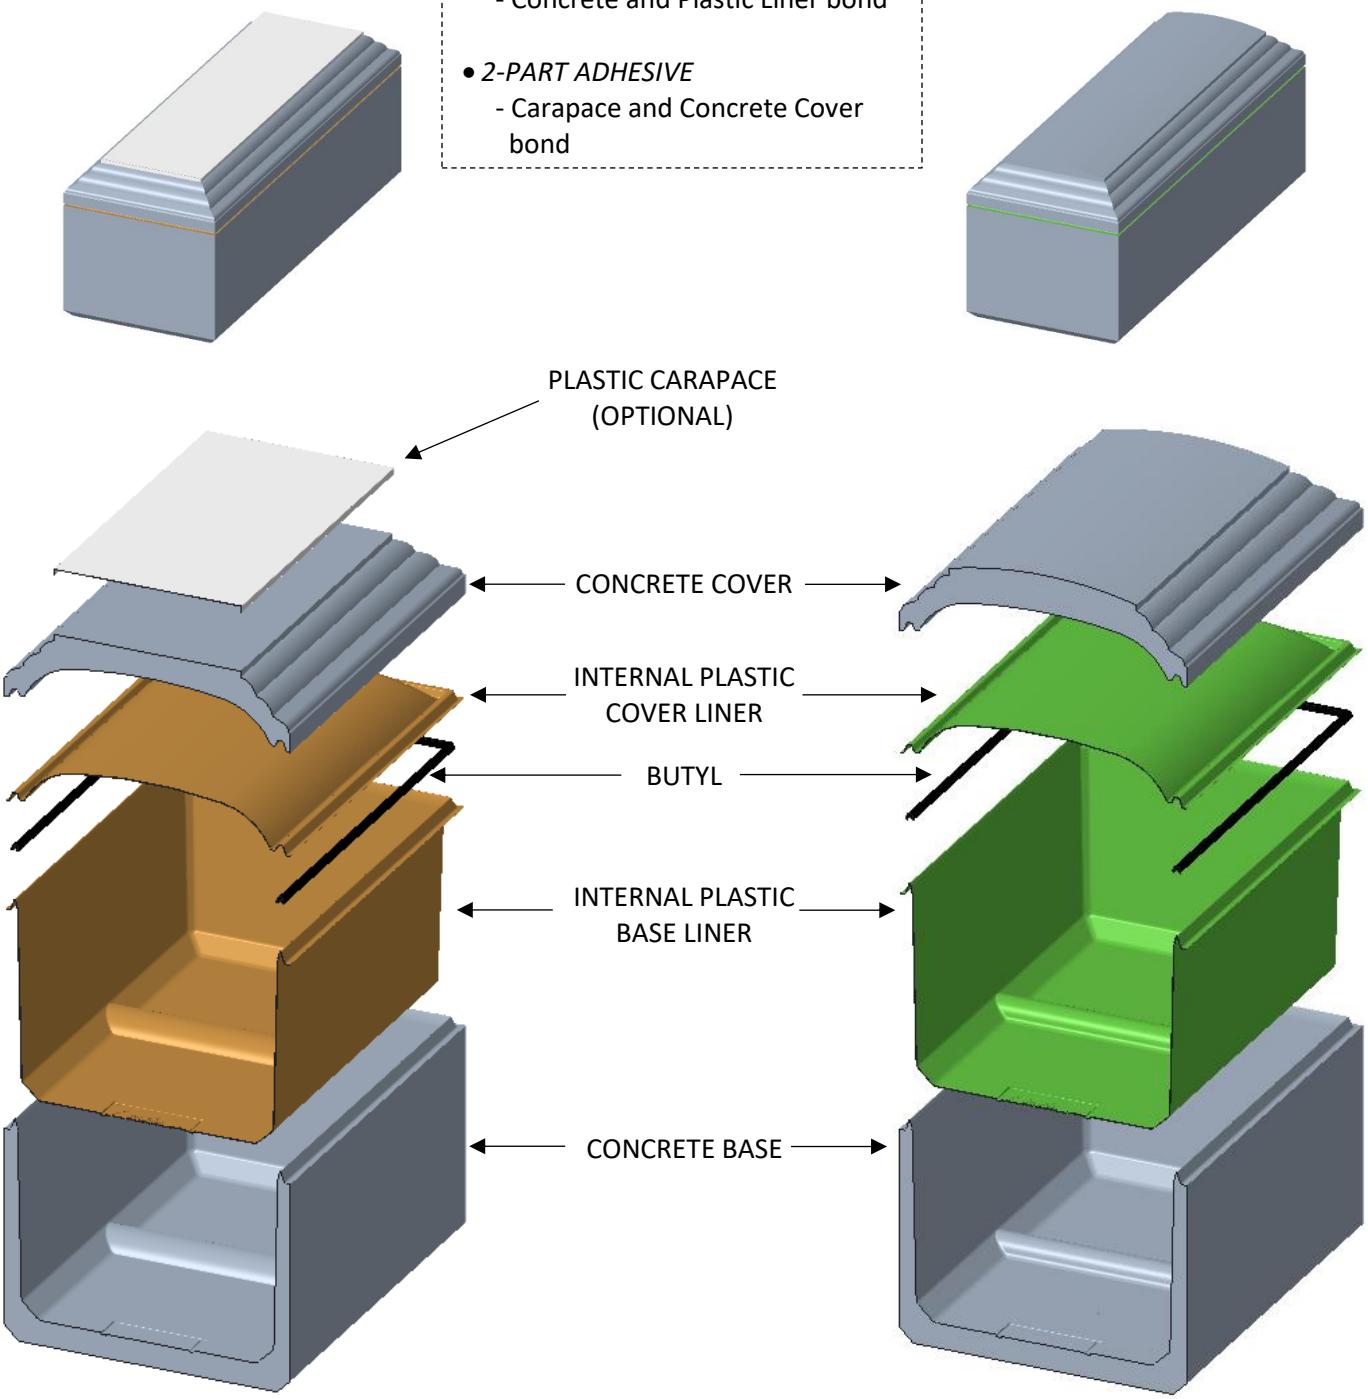

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

SPEED BUMP BASE
(INTERNAL PLASTIC LINER)
OPTION 2

BONDING MATERIAL TO BE USED:

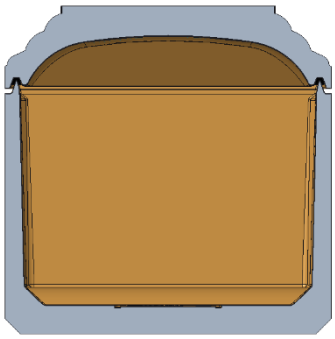

- *UNIDEX*
  - Concrete and Plastic Liner bond
- *2-PART ADHESIVE*
  - Carapace and Concrete Cover bond

CONTINENTAL FLAT TOP

CONTINENTAL PRE-CAST ROUND TOP

CITADEL

UNIT TYPE:	PLASTIC LINED UNIT
CONCRETE COVER PROFILE:	3 BUMPS/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	DOME COVER
BASE LINER:	STANDARD BASE
CARAPACE:	PLASTIC CARAPACE

NOTES/COMMENTS:

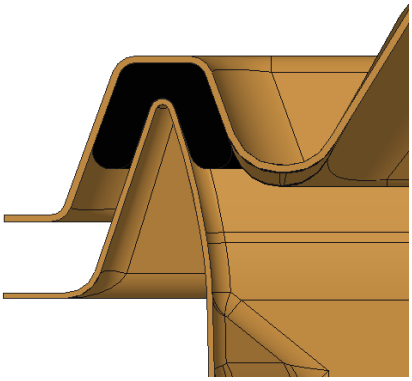

The Citadel Vault provides single-reinforced protection by utilizing one layer of Plastic Liners for cover and base. Casket rests built into the Plastic Base Liners. Schematics of the vault assembly shown in the next page.

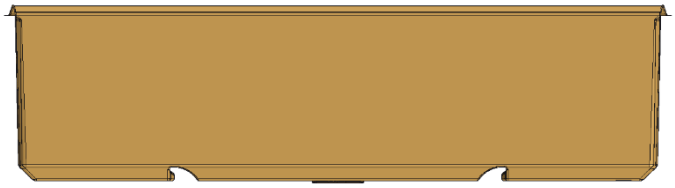

3 BUMPS/FLAT TOP
(CONCRETE COVER PROFILE)

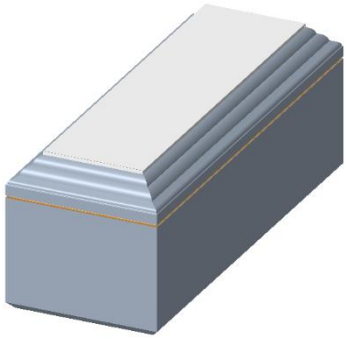

DOME COVER
(INTERNAL PLASTIC LINER)

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

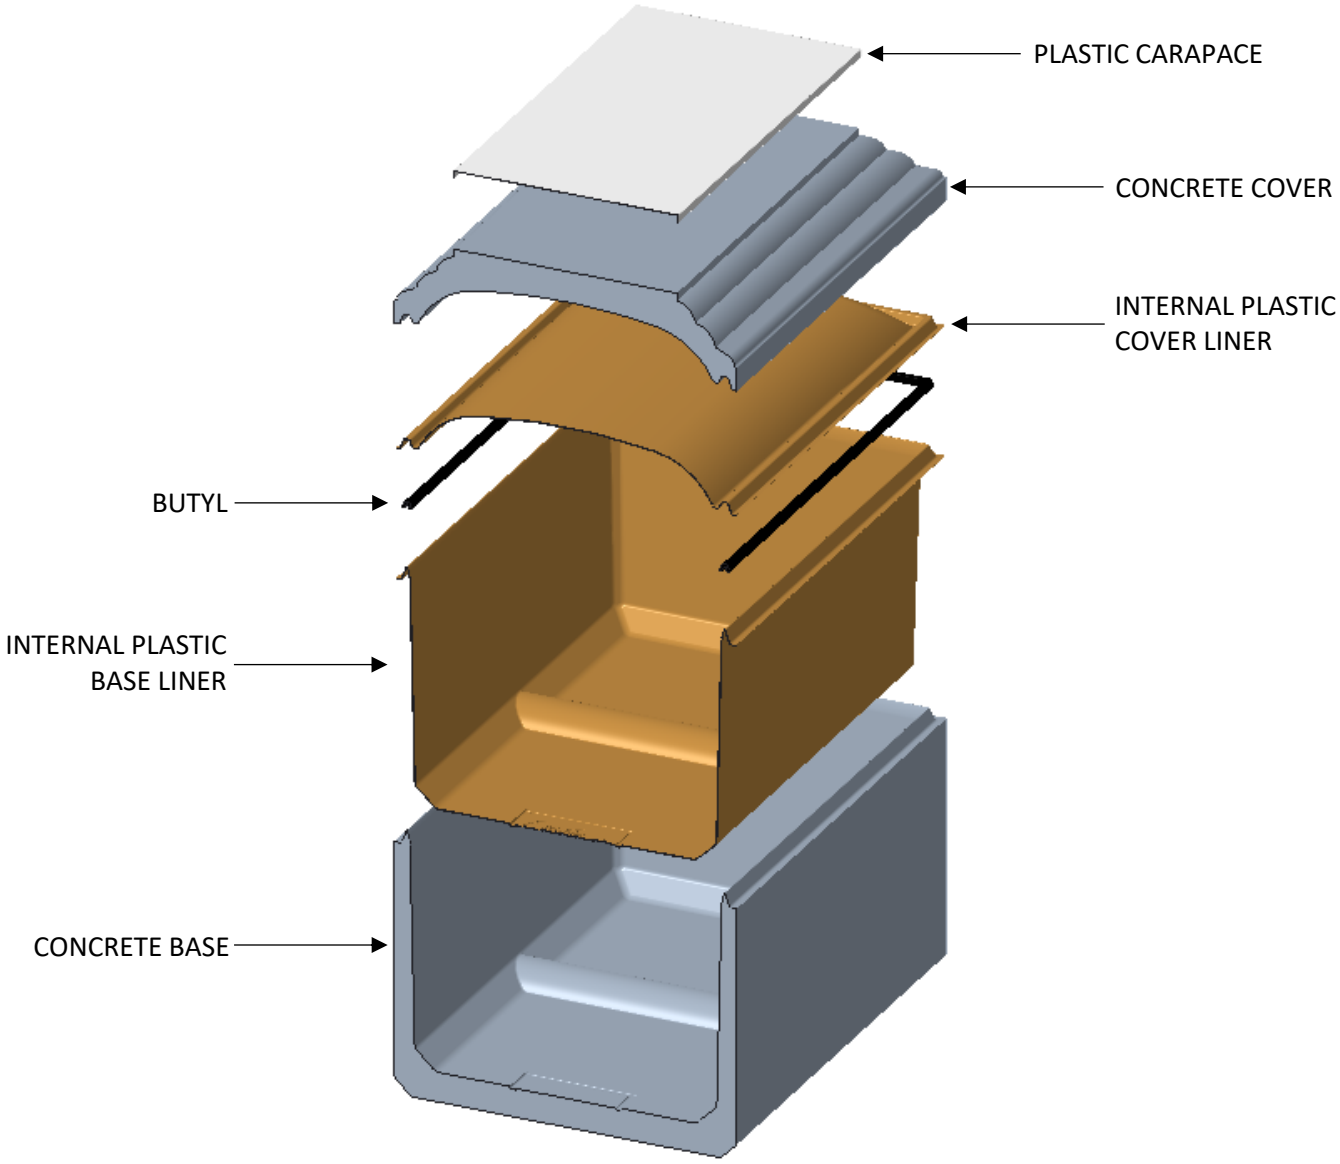

STANDARD BASE
(INTERNAL PLASTIC LINER)

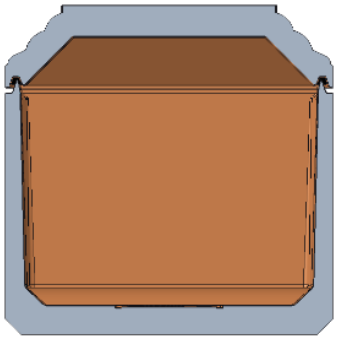

BONDING MATERIAL TO BE USED:

- *UNIDEX*
  - Concrete and Plastic Liner bond
- *2-PART ADHESIVE*
  - Carapace and Concrete Cover bond

CITADEL

VENETIAN

UNIT TYPE:	LINED UNIT
CONCRETE COVER PROFILE:	3 BUMPS/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	MODERN COVER
BASE LINER:	STANDARD BASE
CARAPACE:	PLASTIC CARAPACE

NOTES/COMMENTS:

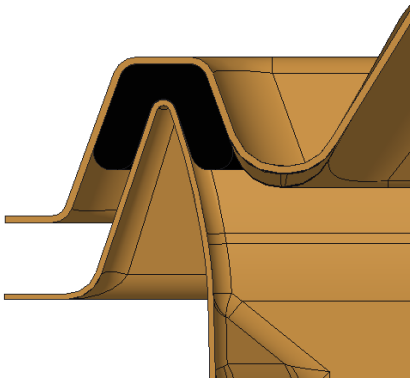

The Venetian Vault provides single-reinforced protection by utilizing one layer of Plastic Liners for cover and base. Casket rests built into the Plastic Base Liners. Schematics of the vault assembly shown in the next page.

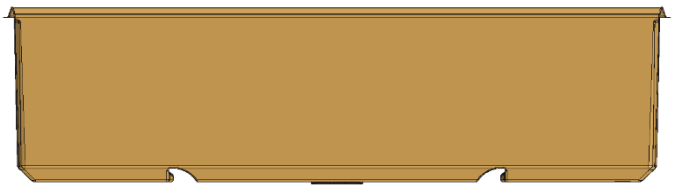

3 BUMPS/FLAT TOP
(CONCRETE COVER PROFILE)

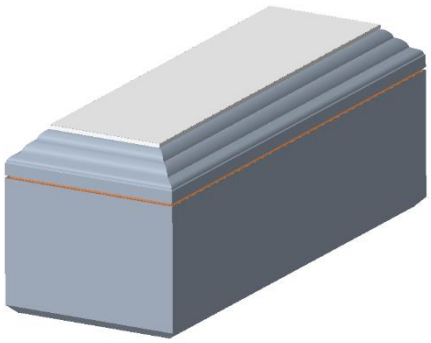

MODERN COVER
(INTERNAL PLASTIC LINER)

TONGUE AND GROOVE WITH BUTYL
(COVER-BASE SEAL)

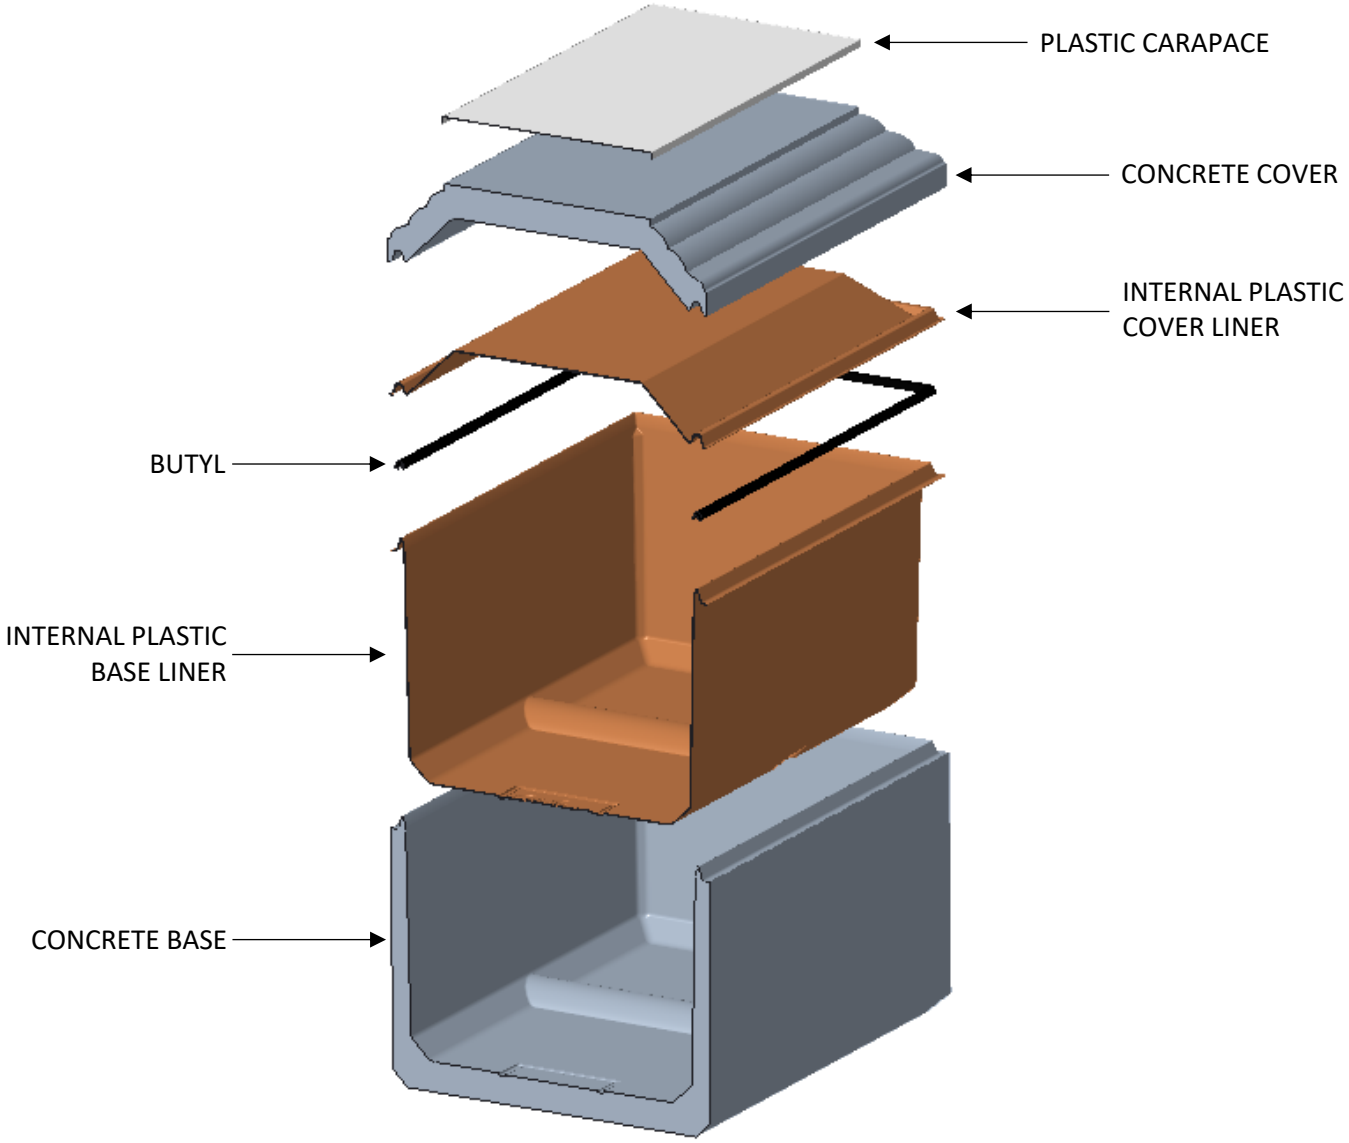

STANDARD BASE
(INTERNAL PLASTIC LINER)

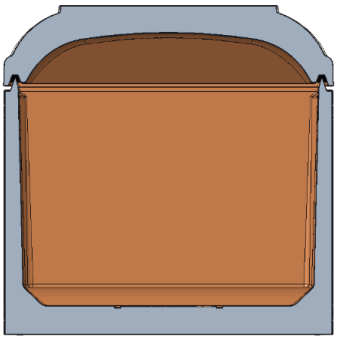

BONDING MATERIAL TO BE USED:

- *UNIDEX*
  - Concrete and Plastic Liner bond
- *2-PART ADHESIVE*
  - Carapace and Concrete Cover bond

VENETIAN

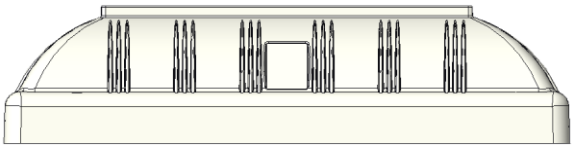

TRIBUTE

UNIT TYPE:	PLASTIC LINED UNIT
CONCRETE COVER PROFILE:	1 BUMP/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL
COVER LINER:	DOME COVER
BASE LINER:	STANDARD BASE
CARAPACE:	PLASTIC CARAPACE

NOTES/COMMENTS:

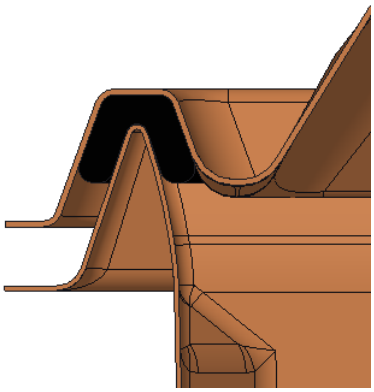

The Tribute Burial Vault provides double-reinforced protection by utilizing two layers of Plastic Liners. One unique feature of the Tribute Vault is the Tribute Base Assembly, which is composed of (2) side pieces and (2) end pieces. Another unique feature of this Vault is the pattern layout embedded into the external plastics for cover and base. Schematics of the vault assembly shown in the next page.

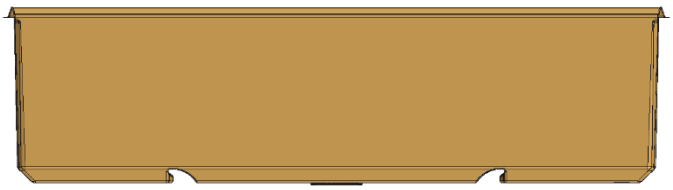

1 BUMP/FLAT TOP
(CONCRETE COVER PROFILE)

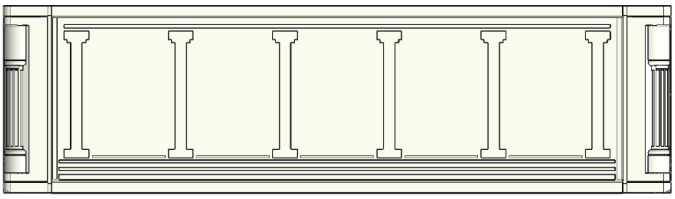

DOME COVER
(INTERNAL PLASTIC LINER)

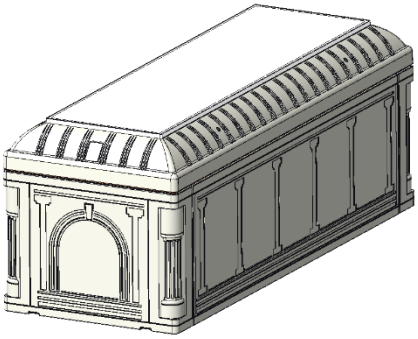

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

STANDARD BASE
(INTERNAL PLASTIC LINER)

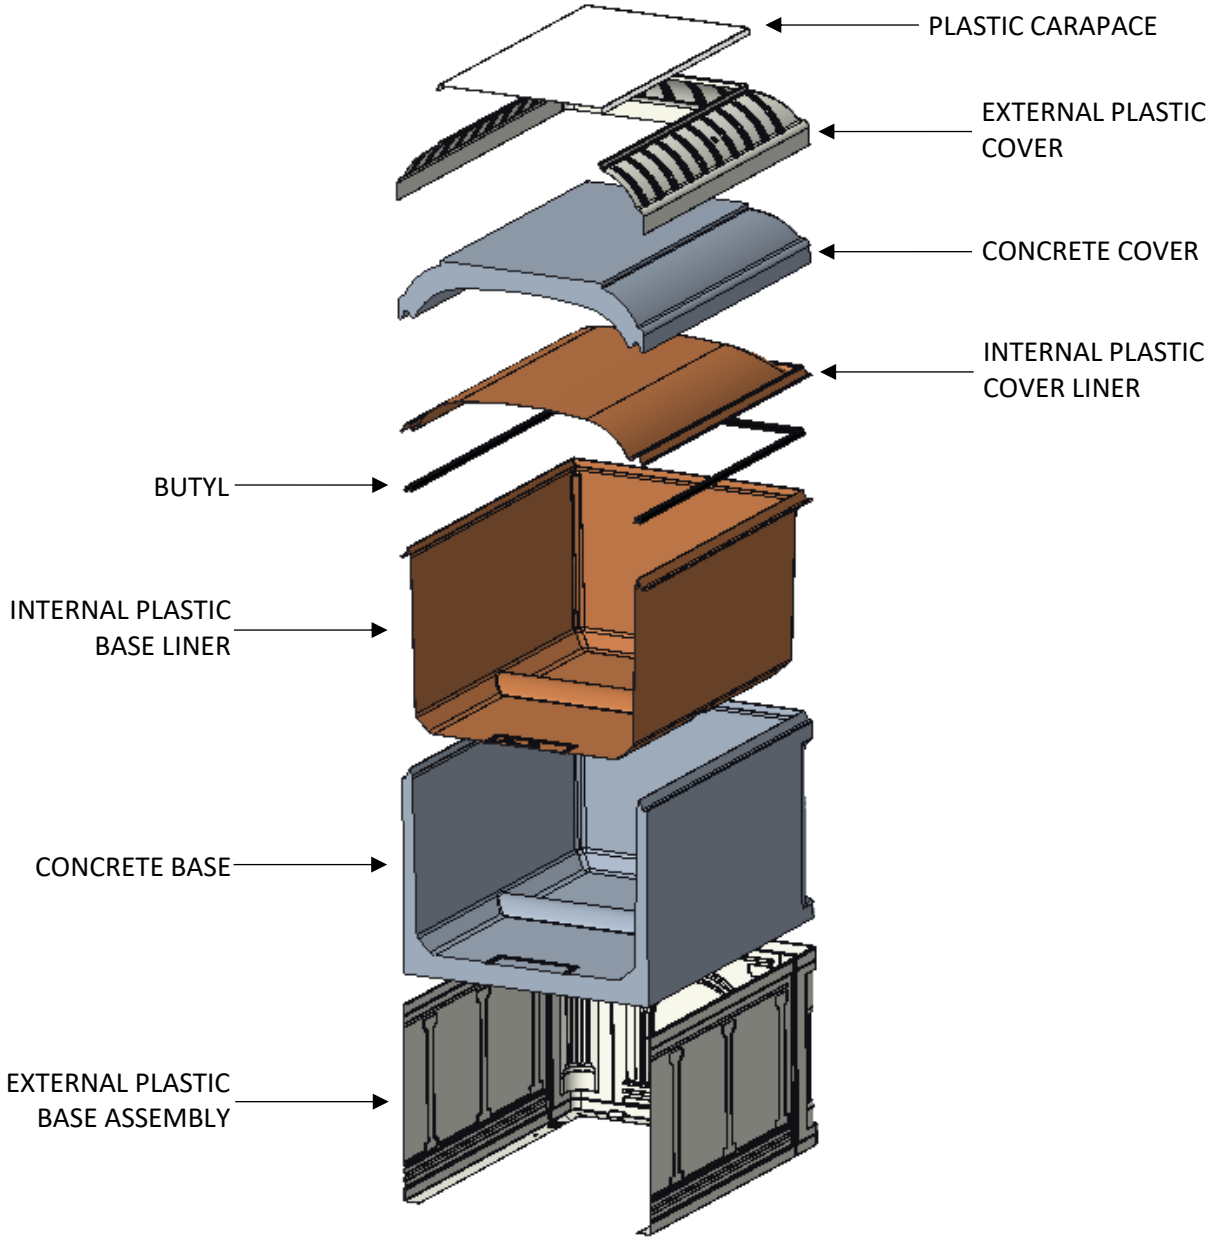

TRIBUTE BASE ASSEMBLY
(EXTERNAL PLASTIC ASSEMBLY)

BONDING MATERIAL TO BE USED:

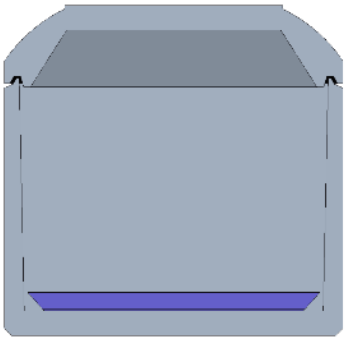

- *UNIDEX*
  - Concrete and Plastic Liner bond
- *2-PART ADHESIVE*
  - Carapace and Concrete Cover bond

TRIBUTE

UNLINED BURIAL VAULTS

MONARCH

UNIT TYPE:	UNLINED UNIT
CONCRETE COVER PROFILE:	1 BUMP/TONGUE AND GROOVE/FLAT TOP 1 BUMP/FLAT/FLAT TOP
COVER - BASE SEAL:	TONGUE AND GROOVE WITH BUTYL FLAT
COVER LINER:	NONE
BASE LINER:	NONE
CARAPACE:	NONE

NOTES/COMMENTS:

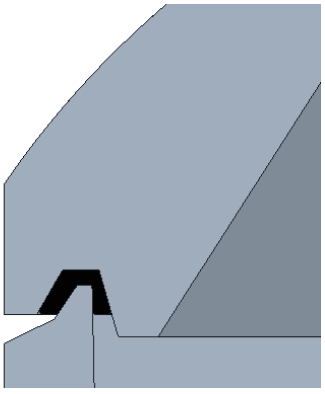

The Monarch Burial Vaults are concrete boxes without reinforced plastic protection. One unique feature of the Monarch Vaults is its wide range of sizes, as it is not limited by Plastic Liner dimensions. The Monarch also offers (2) types of Cover-Base sealing options as shown below. The casket rest is provided as an optional add-on. Schematics of the vault assembly shown in the next page.

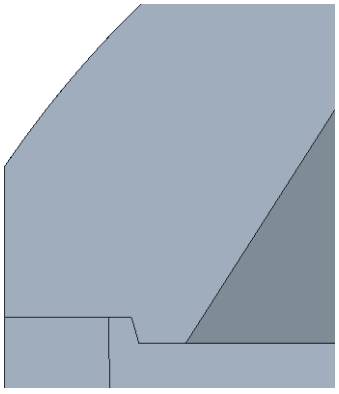

1 BUMP/TONGUE AND GROOVE/FLAT TOP
(CONCRETE COVER PROFILE)

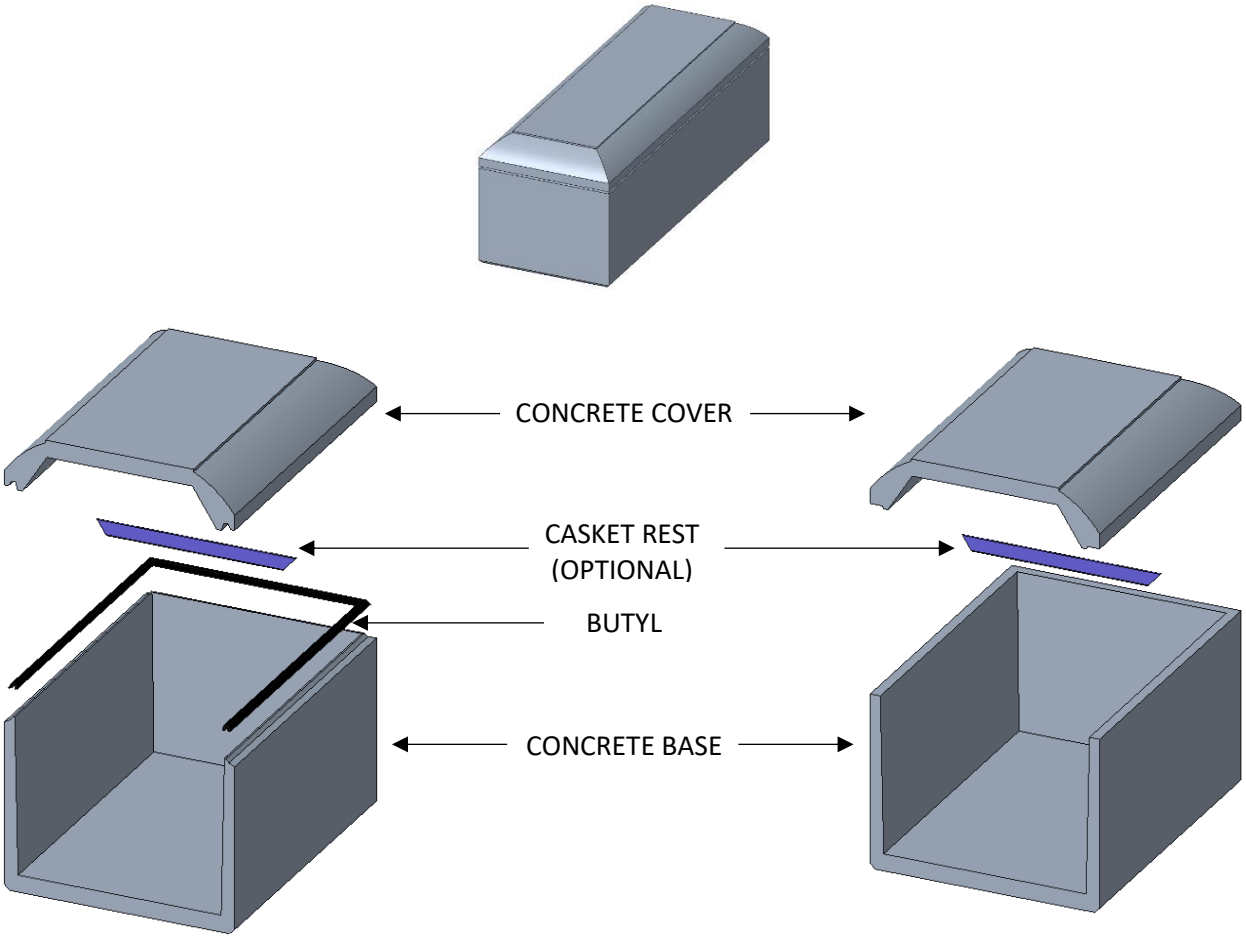

1 BUMP/FLAT/FLAT TOP
(CONCRETE COVER PROFILE)

TONGUE AND GROOVE WITH BUTYL
(COVER – BASE SEAL)

MONARCH
(FLAT SEAL)

GRAVE BOX

UNIT TYPE:	UNLINED UNIT
CONCRETE COVER PROFILE:	NO BUMP/STANDARD NO BUMP/FLAT
COVER - BASE SEAL:	FLAT
COVER LINER:	NONE
BASE LINER:	NONE
CARAPACE:	NONE

NOTES/COMMENTS:

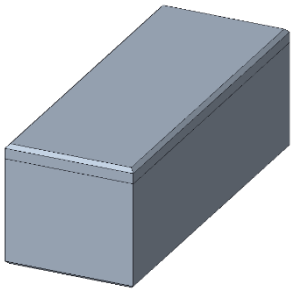

The Grave Box Burial Vaults are also concrete boxes without reinforced plastic protection. The Grave Box varies in size, as it too is not limited by plastic liner dimensions. All Grave Boxes utilize a flat seal between cover and base, meaning no butyl is used with these vaults. One unique feature of the Grave box is the weight saving Concrete Cover option as shown below. Casket rests provided as an optional add-on. Schematics of the vault assembly shown below.

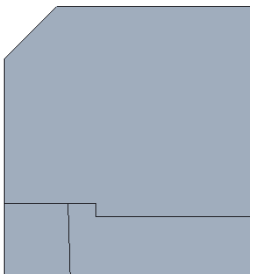

NO BUMP/STANDARD
(CONCRETE COVER PROFILE)
OPTION 1 – WEIGHT SAVING

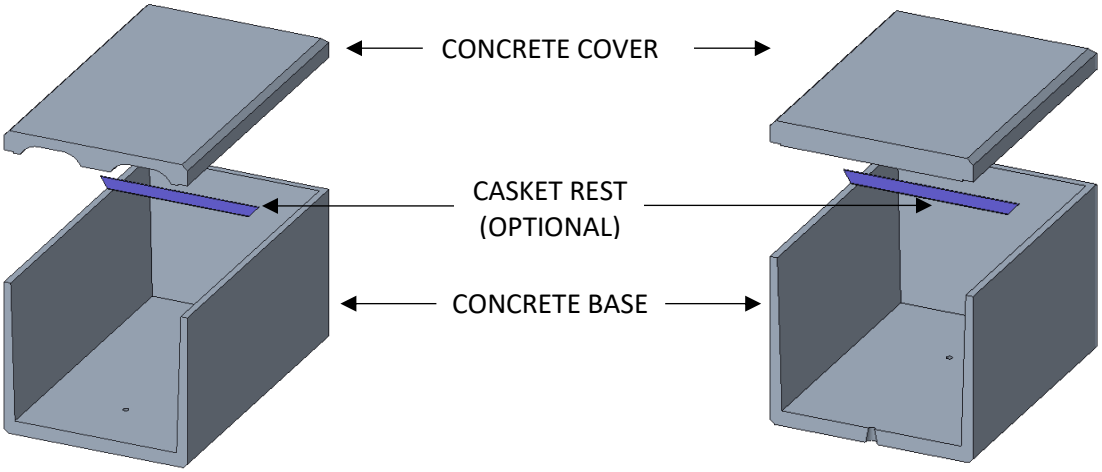

NO BUMP/FLAT
